

## USB-C Multiport Adapter - 4K 60 Hz HDMI, 3 USB-A Hub Ports, 100W PD Charging, HDR, HDCP 2.2

## MODEL NUMBER: U444-06N-H3UC2

Adds 4K HDMI, 3 USB-A hub ports and USB-C PD charging to the USB-C or Thunderbolt 3 port on your MacBook or Chromebook.

## Features

## USB-C Adapter Turns Your USB-C or Thunderbolt 3 Device into a Multiport Workstation

This versatile 4K adapter adds multiple ports to the USB-C or Thunderbolt 3 port on your MacBook Pro or Windows laptop. The U444-06N-H3UC2 allows you to transmit digital audio and 4K video to a large display, add a thumb drive and other USB peripherals, and power and charge a PD Charging-compliant mobile device simultaneously.

## Supports USB-C DisplayPort Alternate Mode for Converting Audio/Video Signals

By connecting the built-in USB-C cable to a source device that supports USB DisplayPort Alt Mode, you can output 4K video and digital audio to an HDMI monitor, television or projector without installing special software drivers.

## Transmits Crystal-Clear 4K Video with HDR and 4:4:4 Color

The U444-06N-H3UC2 supports Ultra HD video resolutions up to 3840 x 2160 (4K x 2K) at 60 Hz, when connected to a DisplayPort 1.4 source device, and 3840 x 2160 at 30 Hz when connected to a DisplayPort 1.2 source. It also supports HDR, providing a wide range of vibrant colors with richer contrast, brighter whites and deeper blacks that pop on your 4K display. HDCP 2.2 compliance allows you to stream 4K Amazon and Netflix content with no complications. This adapter also supports 4:4:4 chroma subsampling for top-level PC gaming or using your HDTV as a PC monitor.

## Connects USB Peripherals and Transfers Data at Fast USB 3.1 Gen 1 Speeds

Three USB-A ports accept USB peripherals, such as a flash drive, mouse and keyboard, and share up to 5V 1.6A (8W) for charging and powering mobile devices (one port supports 7.5W max charging on its own). It transfers data at speeds up to 5 Gbps, which is 10 times faster than USB 2.0. The port is backward compatible with previous USB generations, so you can continue using older peripherals while getting high-speed performance from new devices. Note: Host must support USB OTG (On-the-Go)

## PD 3.0 Charging Port Charges High-Powered Devices via AC Wall Charger

The USB-C Power Delivery port provides power output up to 20V 5A (100W), which is more than sufficient for charging and powering the connected source device, such as a MacBook or Chromebook. Connect the port to the device's AC wall charger. Like the USB-A ports, the USB-C port also supports data transfer speeds up to 5 Gbps. Note: USB-C PD port does not support Quick Charge (QC).

## Highlights

- USB-C adapter supports 4K @ 60 Hz digital video resolutions as specified in HDMI 2.0
- Carries High Dynamic Range (HDR) signals for rich contrast and expanded color accuracy
- Converts audio/video signals from sources supporting USB-C DisplayPort Alt Mode
- Power Delivery port provides 20V 5A (100W) output for charging connected device
- USB-A ports support USB 3.1 Gen 1 speeds up to 5 Gbps for fast data transfers

## Applications

### Ready to Use Right from the Package, So You Can Plug and Play Immediately

The plug-and-play adapter is specifically designed for the MacBook, Google Chromebook Pixel and other laptops, tablets and devices equipped with a USB-C or Thunderbolt 3 port. It requires no software or external power. This adapter is backward compatible with 1080p displays, allowing you to use it with older equipment. The U444-06N-H3UC2 fits into a pocket, purse or laptop bag for convenient connections on the go.
