## 3SU1853-3NB00-1AA1

Two-hand operation console for command devices, 22 mm, round, Enclosure material metal, enclosure top part gray, 3 control points metal, standard equipment: 2 mushroom pushbuttons black 40 mm, 2x1NO+1NC, screw terminal, 1 EMERGENCY STOP red, 40 mm, 2 NC, screw terminal,

product brand name	SIRIUS ACT
product designation	Two-hand operation console
product type designation	3SU1
manufacturer's article number	
of supplied contact module	R2 = 3SU1400-1AA10-1BA0 / L2 = 3SU1400-1AA10-1BA0 / M1 = 3SU1400-1AA10-1CA0 / R1 = 3SU1400-1AA10-1CA0 / L1 = 3SU1400-1AA10-1CA0 / M2 = 3SU1400-1AA10-1CA0
<ul> <li>of supplied contact module at the command point A</li> </ul>	3SU1400-1AA10-1CA0
<ul> <li>of supplied contact module at the command point A</li> <li>3</li> </ul>	3SU1400-1AA10-1BA0
<ul> <li>of supplied contact module at the command point B</li> </ul>	3SU1400-1AA10-1CA0
<ul> <li>of supplied contact module at the command point B</li> <li>3</li> </ul>	3SU1400-1AA10-1CA0
<ul> <li>of supplied contact module at the command point C</li> </ul>	3SU1400-1AA10-1CA0
<ul> <li>of supplied contact module at the command point C</li> <li>3</li> </ul>	3SU1400-1AA10-1BA0
<ul> <li>of the supplied holder at the command point A</li> </ul>	3SU1550-0AA10-0AA0
<ul> <li>of the supplied holder at the command point B</li> </ul>	3SU1550-0AA10-0AA0
<ul> <li>of the supplied holder at the command point C</li> </ul>	3SU1550-0AA10-0AA0
<ul> <li>of the supplied actuator at the command point A</li> </ul>	3SU1050-1BD10-0AA0
<ul> <li>of the supplied actuator at the command point B</li> </ul>	3SU1050-1HB20-0AA0
<ul> <li>of the supplied actuator at the command point C</li> </ul>	3SU1050-1BD10-0AA0
<ul> <li>of supplied empty enclosure</li> </ul>	3SU1853-3AA00-0AA1
• of the supplied accessories at the command point B	3SU1900-0BB31-0AT0
nclosure	
design of the housing	Two-hand operating console with standard components
material of the enclosure	metal
number of command points	3
color of the enclosure top part	grey
delivery state	
• as a kit	No
<ul> <li>pre-wired on strip terminal</li> </ul>	No
fastening method of the enclosure	Horizontal
actuator	
design of the actuating element	A = mushroom pushbutton / B = EMERGENCY STOP mushroom pushbutton / C = mushroom pushbutton
principle of operation of the actuating element	A = momentary contact / B = latching / C = momentary contact

product feature	
• lockout	No
staggered switching	No
color of the actuating element	A = black / B = red / C = black
material of the actuating element	metal
shape of the actuating element	round
number of contact modules	6
type of unlocking device	A = none / B = rotate to unlock / C = none
Front ring	
product component front ring	Yes
material of the front ring	metal
color of the front ring	silver
Holder	
material of the holder	Metal
General technical data	
product function	
positive opening	Yes
EMERGENCY OFF function	Yes
EMERGENCY STOP function	Yes
product component stand/pedestal	No
protection class IP	IP66
degree of protection NEMA rating	1, 2, 3, 3R, 4, 4X, 12, 13
shock resistance acc. to IEC 60068-2-27	Sinusoidal half-wave 50g / 11 ms
vibration resistance acc. to IEC 60068-2-6	10 500 Hz: 5g
reference code acc. to IEC 81346-2	S
continuous current of the C characteristic MCB	10 A; for a short-circuit current smaller than 400 A
continuous current of the quick DIAZED fuse link	10 A
continuous current of the DIAZED fuse link gG	10 A
	1071
Auxiliary circuit	Silver alley
design of the contact of auxiliary contacts	Silver alloy
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts	4
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts	
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts Connections/ Terminals	2
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts Connections/ Terminals type of electrical connection on enclosure	4
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts Connections/ Terminals type of electrical connection on enclosure Safety related data	2 Cable routing at the rear 2 x M25
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts Connections/ Terminals type of electrical connection on enclosure Safety related data B10 value with high demand rate acc. to SN 31920	2
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920 proportion of dangerous failures	Cable routing at the rear 2 x M25
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920  proportion of dangerous failures  • with low demand rate acc. to SN 31920	2 Cable routing at the rear 2 x M25  100 000 20 %
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920 proportion of dangerous failures  • with low demand rate acc. to SN 31920 • with high demand rate acc. to SN 31920	2  Cable routing at the rear 2 x M25  100 000  20 % 20 %
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals  type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920  proportion of dangerous failures  • with low demand rate acc. to SN 31920  • with high demand rate acc. to SN 31920  failure rate [FIT] with low demand rate acc. to SN 31920	2  Cable routing at the rear 2 x M25  100 000  20 % 20 % 100 FIT
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920 proportion of dangerous failures  • with low demand rate acc. to SN 31920 • with high demand rate acc. to SN 31920 failure rate [FIT] with low demand rate acc. to SN 31920  T1 value for proof test interval or service life acc. to IEC 61508	2  Cable routing at the rear 2 x M25  100 000  20 % 20 %
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals  type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920  proportion of dangerous failures  • with low demand rate acc. to SN 31920  • with high demand rate acc. to SN 31920  failure rate [FIT] with low demand rate acc. to SN 31920  T1 value for proof test interval or service life acc. to	2  Cable routing at the rear 2 x M25  100 000  20 % 20 % 100 FIT
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920 proportion of dangerous failures  • with low demand rate acc. to SN 31920 • with high demand rate acc. to SN 31920 failure rate [FIT] with low demand rate acc. to SN 31920  T1 value for proof test interval or service life acc. to IEC 61508	2  Cable routing at the rear 2 x M25  100 000  20 % 20 % 100 FIT
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals  type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920  proportion of dangerous failures  • with low demand rate acc. to SN 31920  • with high demand rate acc. to SN 31920  failure rate [FIT] with low demand rate acc. to SN 31920  T1 value for proof test interval or service life acc. to IEC 61508  Ambient conditions  • ambient temperature during operation	4 2 Cable routing at the rear 2 x M25  100 000 20 % 20 % 100 FIT 20 y
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals  type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920  proportion of dangerous failures  • with low demand rate acc. to SN 31920  • with high demand rate acc. to SN 31920  failure rate [FIT] with low demand rate acc. to SN 31920  T1 value for proof test interval or service life acc. to IEC 61508  Ambient conditions	4 2 Cable routing at the rear 2 x M25  100 000  20 % 20 % 100 FIT 20 y  -25 +70 °C
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals  type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920  proportion of dangerous failures  • with low demand rate acc. to SN 31920  • with high demand rate acc. to SN 31920  failure rate [FIT] with low demand rate acc. to SN 31920  T1 value for proof test interval or service life acc. to IEC 61508  Ambient conditions  • ambient temperature during operation • ambient temperature during storage environmental category during operation acc. to IEC	2  Cable routing at the rear 2 x M25  100 000  20 % 20 % 100 FIT 20 y  -25 +70 °C -40 +80 °C 3M6, 3S2, 3B2, 3C3, 3K6 (with relative air humidity of 10 95 %, no
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920 proportion of dangerous failures  • with low demand rate acc. to SN 31920  • with high demand rate acc. to SN 31920 failure rate [FIT] with low demand rate acc. to SN 31920  T1 value for proof test interval or service life acc. to IEC 61508  Ambient conditions  • ambient temperature during operation • ambient temperature during storage environmental category during operation acc. to IEC 60721  Installation/ mounting/ dimensions	Cable routing at the rear 2 x M25  100 000  20 % 20 % 100 FIT 20 y  -25 +70 °C -40 +80 °C  3M6, 3S2, 3B2, 3C3, 3K6 (with relative air humidity of 10 95 %, no condensation in operation permitted for all devices behind front panel)
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals  type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920  proportion of dangerous failures  • with low demand rate acc. to SN 31920  • with high demand rate acc. to SN 31920  failure rate [FIT] with low demand rate acc. to SN 31920  T1 value for proof test interval or service life acc. to IEC 61508  Ambient conditions  • ambient temperature during operation • ambient temperature during storage environmental category during operation acc. to IEC 60721  Installation/ mounting/ dimensions fastening method of modules and accessories	2  Cable routing at the rear 2 x M25  100 000  20 % 20 % 100 FIT 20 y  -25 +70 °C -40 +80 °C 3M6, 3S2, 3B2, 3C3, 3K6 (with relative air humidity of 10 95 %, no
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920 proportion of dangerous failures  • with low demand rate acc. to SN 31920  • with high demand rate acc. to SN 31920 failure rate [FIT] with low demand rate acc. to SN 31920  T1 value for proof test interval or service life acc. to IEC 61508  Ambient conditions  • ambient temperature during operation • ambient temperature during storage environmental category during operation acc. to IEC 60721  Installation/ mounting/ dimensions	Cable routing at the rear 2 x M25  100 000  20 % 20 % 100 FIT 20 y  -25 +70 °C -40 +80 °C 3M6, 3S2, 3B2, 3C3, 3K6 (with relative air humidity of 10 95 %, no condensation in operation permitted for all devices behind front panel)  Front plate mounting
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920 proportion of dangerous failures	Cable routing at the rear 2 x M25  100 000  20 % 20 % 100 FIT 20 y  -25 +70 °C -40 +80 °C 3M6, 3S2, 3B2, 3C3, 3K6 (with relative air humidity of 10 95 %, no condensation in operation permitted for all devices behind front panel)  Front plate mounting 185.6 mm 492.4 mm
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920 proportion of dangerous failures  • with low demand rate acc. to SN 31920  • with high demand rate acc. to SN 31920 failure rate [FIT] with low demand rate acc. to SN 31920  T1 value for proof test interval or service life acc. to IEC 61508  Ambient conditions  • ambient temperature during operation • ambient temperature during operation acc. to IEC 60721  Installation/ mounting/ dimensions fastening method of modules and accessories height width depth	Cable routing at the rear 2 x M25  100 000  20 % 20 % 100 FIT 20 y  -25 +70 °C -40 +80 °C 3M6, 3S2, 3B2, 3C3, 3K6 (with relative air humidity of 10 95 %, no condensation in operation permitted for all devices behind front panel)  Front plate mounting 185.6 mm
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals  type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920  proportion of dangerous failures  • with low demand rate acc. to SN 31920  • with high demand rate acc. to SN 31920  failure rate [FIT] with low demand rate acc. to SN 31920  T1 value for proof test interval or service life acc. to IEC 61508  Ambient conditions  • ambient temperature during operation • ambient temperature during storage environmental category during operation acc. to IEC 60721  Installation/ mounting/ dimensions fastening method of modules and accessories height width depth Accessories	Cable routing at the rear 2 x M25  100 000  20 % 20 % 100 FIT 20 y  -25 +70 °C -40 +80 °C 3M6, 3S2, 3B2, 3C3, 3K6 (with relative air humidity of 10 95 %, no condensation in operation permitted for all devices behind front panel)  Front plate mounting 185.6 mm 492.4 mm 159.5 mm
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals  type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920  proportion of dangerous failures  • with low demand rate acc. to SN 31920  • with high demand rate acc. to SN 31920  failure rate [FIT] with low demand rate acc. to SN 31920  T1 value for proof test interval or service life acc. to IEC 61508  Ambient conditions  • ambient temperature during operation • ambient temperature during operation acc. to IEC 60721  Installation/ mounting/ dimensions  fastening method of modules and accessories height width depth  Accessories number of backing plates	Cable routing at the rear 2 x M25  100 000  20 % 20 % 100 FIT 20 y  -25 +70 °C -40 +80 °C 3M6, 3S2, 3B2, 3C3, 3K6 (with relative air humidity of 10 95 %, no condensation in operation permitted for all devices behind front panel)  Front plate mounting 185.6 mm 492.4 mm 159.5 mm
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals  type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920  proportion of dangerous failures  • with low demand rate acc. to SN 31920  • with high demand rate acc. to SN 31920  failure rate [FIT] with low demand rate acc. to SN 31920  T1 value for proof test interval or service life acc. to IEC 61508  Ambient conditions  • ambient temperature during operation • ambient temperature during storage environmental category during operation acc. to IEC 60721  Installation/ mounting/ dimensions fastening method of modules and accessories height width depth  Accessories number of backing plates marking of backing plate	Cable routing at the rear 2 x M25  100 000  20 % 20 % 100 FIT 20 y  -25 +70 °C -40 +80 °C 3M6, 3S2, 3B2, 3C3, 3K6 (with relative air humidity of 10 95 %, no condensation in operation permitted for all devices behind front panel)  Front plate mounting 185.6 mm 492.4 mm 159.5 mm  1 EMERGENCY-STOP
design of the contact of auxiliary contacts number of NC contacts for auxiliary contacts number of NO contacts for auxiliary contacts  Connections/ Terminals  type of electrical connection on enclosure  Safety related data  B10 value with high demand rate acc. to SN 31920  proportion of dangerous failures  • with low demand rate acc. to SN 31920  • with high demand rate acc. to SN 31920  failure rate [FIT] with low demand rate acc. to SN 31920  T1 value for proof test interval or service life acc. to IEC 61508  Ambient conditions  • ambient temperature during operation • ambient temperature during operation acc. to IEC 60721  Installation/ mounting/ dimensions  fastening method of modules and accessories height width depth  Accessories number of backing plates	Cable routing at the rear 2 x M25  100 000  20 % 20 % 100 FIT 20 y  -25 +70 °C -40 +80 °C 3M6, 3S2, 3B2, 3C3, 3K6 (with relative air humidity of 10 95 %, no condensation in operation permitted for all devices behind front panel)  Front plate mounting 185.6 mm 492.4 mm 159.5 mm
