Item description

Male connector/plug *WINSTA*® MIDI 5-pole

The *WINSTA*® MIDI male connector/plug rated current 25 A saves money and space thanks to its compact dimensions. Our large selection of pluggable PCB connectors with various insertion directions and operating variants offers you the right solution for your application at all times. For greater security in electrical installations, the pcb connector is provided with mechanical protection against mismating. Solutions like the *WINSTA*® MIDI pcb connectors with B coding are suitable for applications related to process control, for example, for lighting or within data networks. This pcb connector can be employed for a load of up to 25 A. As a result, pcb connector can also be used for high power loads. The *WINSTA*® MIDI Pluggable Connection System with Push-in CAGE CLAMP® spring pressure connection technology facilitates precise electrification. Due to the included test slot, connections can be checked even when they are plugged in. That saves time and reduces installation labor and expense.

WINSTA® MIDI solutions for your electrical installation – protected against mismating and maintenance-free

The WINSTA® Pluggable Connection System is perfectly tailored to the strict requirements of building installation. It makes electrical installation pluggable, and therefore more efficient, more reliable, and error-free. Using this pre-assembled system reduces time spent on assembly and installation errors at the construction site. Now you can also cut installation costs without compromising safety and quality: The *WINSTA*® MIDI pcb connector with protection against mismating reduces the need for servicing and prevents unnecessary downtime.

-
- effective protection against mismating
- pre-assembled versions
- with B coding for use in process automation, such as lighting technology
- quick replacement of defective units during ongoing operation

Coding	B
Variable coding	Yes
Marking	1 2 3 PE N
Potential marking	1 2 3 PE N
Mating force of a plug-in connection	approx. 20 … 70 N (depending on pole number)
Retention force of a plug-in connection	Locked: > 80 N
Unmating force of a plug-in connection	Unlocked: approx. 20 … 70 N (depending on pole number)
Number of mating cycles	200, without resistive load
Design	straight

Plug-in connection

Contact type (pluggable connector)	Male connector/plug
Connector (connection type)	for PCB
Mismating protection	Yes
Note on mismating protection	All *WINSTA*® components are 100% protected against mismating when: a.) plugging different numbers of poles b.) plugging while rotated 180 c.) plugging while laterally staggered d.) plugging one pole
Mating direction to the PCB	90 °
Locking lever	yes
Locking of plug-in connection	locking lever
Note on locking system	All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

PCB contact

PCB contact	THT
Solder pin arrangement	2 in-line solder pins/pole
Number of solder pins per potential	2
