

Product Change Notification		Date September 22, 2020
Product	Digi LR54 Notice #200922-01	

Audience	All cellular product distributors.
Product Notice	Digi is pleased to announce the update of the Digi LR54 to an updated operating system. All new Digi LR54 orders will ship with this new Digi Accelerated Linux (DAL) firmware. Available immediately

Product Description	<p>The LR54 is a rugged, high-speed cellular router with unique specifications, and it fits well in applications requiring higher data transmission rates, such as site security monitoring with multiple IP cameras, or business branch-in-a-box.</p> <p>The reason for this update is that by shipping the LR54 with the Digi Accelerated Linux (DAL) Operating System, the router's feature set becomes equivalent to that of all other router and extender products running DAL.</p> <p>Key new functionality of the LR54 router:</p> <ul style="list-style-type: none">• SureLink on any network interface, VPN, VLAN• Automatic APN search (True zero touch commissioning possible)• WAN load-balancing• Available IP pass-through mode for first LAN port• Shell scripting• Digi Remote Manager SMS and proxy support• Captive portal capabilities included with Wi-Fi <p>Additional Features:</p> <ul style="list-style-type: none">• Industrial build quality• Temperature range -20° C to +70° C• High-speed cellular Cat-6 radio• Four (4) high-speed gigabit Ethernet ports<ul style="list-style-type: none">• 1 WAN / LAN (configurable) and 3 LAN• Serial port for out-of-band management of edge devices• Optional Wi-Fi (simultaneous dual band 2.5GHz and 5GHz) <p>The Digi LR54 can be managed with Digi Remote Manager[®] — a web-based device management platform that allows easy setup, mass configuration and maintenance for thousands of remote devices.</p>
----------------------------	---

	For existing Digi LR54 customers, migration information to the new operating system can be found on the Digi support site .
