

SparkX Humidity Sensor Breakout SHTC3 (Qwiic)

SPX-15074 ROHS

Sensirion's SHTC3 digital humidity sensor builds on the success of their SHTC1 sensor. The SHTC3 has a broader supply voltage range (1.62V to 3.6V) and higher accuracy ($\pm 2\%$ RH, $\pm 0.2^\circ\text{C}$) than its predecessor, enabling greater flexibility.

The SHTC3 is low cost, easy-to-use, highly accurate, digital humidity and temperature sensor. This sensor is ideal for environmental sensing and data logging and perfect for build a weather stations or humidior control system. All you need are two lines for I²C communication, and you'll have relative humidity readings and very accurate temperature readings as a bonus!

Hook up is a breeze with as the breakout board is using the Qwiic connect system. The breakout board has built-in 2.2k Ω pullup resistors for I²C communications. If you're hooking up multiple I²C devices on the same bus, you may want to disable these resistors.

Experimental Product: [SparkX](#) products are rapidly produced to bring you the most cutting edge technology as it becomes available. These products are tested but come with no guarantees. Live technical support is not available for SparkX products. Head on over to our [forum](#) for support or to ask a question.
