### Description of Change:

Updated the firmware in the ProFLEX01-R2 modules to:

- The mechanism to disable the CCA was not working due to one of the changes in the 3.2 release.
- OTA security on repeated messages was not working due to one of the changes in the 3.2 release.

CCA setting (sent on a message by message basis) can fail to be applied after module is put to sleep

### Reason for Change:

The updated firmware improves the functionality to the modules.

### Anticipated Impact of the Change:

None

### Future Firmware Releases:

Barring any major firmware defects, LSR does not plan on changing the firmware that ships on the module again. If additional features or minor bug fixes are made to the firmware, it will be posted on the ProFLEX01 product page on the LSR website [www.lsr.com](http://www.lsr.com). It will be the customer's choice to use an updated firmware image.
