Subject: End-of-life notification for Eaton Bussmann series GV2G comb busbars and GVG09 input power terminal

Dear valued customer:

Effective immediately, the Eaton Bussmann™ series GV2G comb busbars and GVG09 input power terminal accessories for the Optima™ NG overcurrent protection module have been obsoleted. These products have no equivalent replacements. We will continue to offer product until all current stock is depleted. Please see the table below for the product SKUs impacted by this obsolescence.
