

OTP c100

OATH Event Based

OTP c100 token enables strong authentication by positively identifying user with one-time passwords. Simply pressing the button OTP c100 generates a secure event synchronous one-time password, ensuring proper identification and allowing only authorized access to critical applications and sensitive data.

OTP c100 is a connectionless device offering user true zero-footprint authentication. OTP c100 complies with OATH standards in event-based authentication methods. It works with OTP authentication server as well as other 3rd remote access and network access devices, to provide best-of-breed solutions for security needs.

Key Features

- Strong two-factor authenticator
- Unique password generated
- Unique token serial number
- Zero software install on client side
- Zero footprint authentication
- Easy and faster integration into both centralized and distributed way
- Compliant with OATH open algorithm, seamless integration with 3rd-party systems
- Support for a wide range of authentication and access gateway solutions to protect your most important assets and information
- Physical testing certified with FCC: Method RS101/MIL-STD-461D, CE: EN61000-6-2, and EN55022
- Chemical resistance, Ultraviolet resistance, Magnetism resistance, and resistance to electrostatic
