

**Mini-Mac  
Applicator**

**Application Tooling  
Specification Sheet**

**Order No. 63893-4300**

**FEATURES**

- Directly adapts to most automatic wire processing machines
- Applicator designed to industry standard mounting and shut height 135.80mm (5.346")
- Quick set-up time; plus the crimp height, track and feed adjustments can be set without removing the applicator from the press
- Fine adjustment allows users to achieve target with little effort by adjusting in increments of .015mm (.0006") for barrel crimp height and .063mm (.0025") for insulation height. See notes on Page 2.
- Independent adjustment rings allow users to quickly adjust the barrel or insulation crimp height without affecting each other.

**SCOPE**

Products: Board-In Crimp Terminal Male, 18-24 AWG.

Terminal Series No.	Terminal Order No.		Wire Size		Insulation Diameter Maximum		Strip Length	
			AWG	mm <sup>2</sup>	mm	In.	mm	In.
4706	02-07-2101	50-29-1688	18-24	0.80-0.20	3.05	.120	5.97-6.35	.235-.250

**DEFINITION OF TERMS**

Figure 1

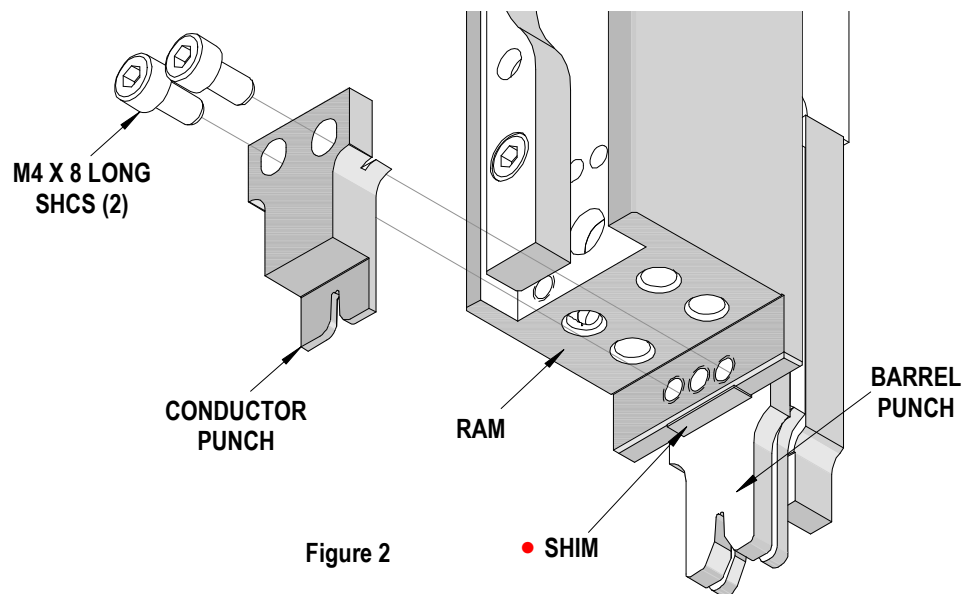

Section E-E

## CRIMP SPECIFICATIONS

After crimping, the conductor profiles should measure the following (See Figure 1).

Terminal Series No.	Wire Size		Dimensions (Figure 1)						Pull Force Minimum (4)	
			D (Ref.)(Conductor)		E-E (Barrel)		F (Ref.)		N	Lb.
	AWG	mm <sup>2</sup>	mm	In.	mm	In.	mm	In.		
4706	18	0.80	1.12	.044	1.72-1.78	.068-.070	.055	1.40	13.34	3.0
	20	0.50	1.12	.044	1.72-1.78	.068-.070	.055	1.40	13.34	3.0
	(5) 22	0.35	0.97	.030	1.72-1.78	.068-.070	.055	1.40	13.34	3.0
	(5) 24	0.20	0.97	.030	1.72-1.78	.068-.070	.055	1.40	13.34	3.0

For the numbers in parentheses follow the number item below.

- Shim location for Conductor Punch. Shim size should be .25 by 3.2 by 12.7mm (.010 by 1/8 by 1/2")

### Notes:

1. To prevent conductor tooling damage with this applicator make sure the shut height of your crimp press is set to 135.80mm (5.346") before installing the applicator. Also hand cycle the first crimp to verify tooling alignment.
2. The reference conductor crimp heights listed in the table above are suggested to achieve the minimum pull force.
3. **Because the soldering operation between the wire and terminal is the electrical connection and not the conductor crimp**, the conductor crimp height can deviate from the suggested values listed in the table above due to wire type or other variables.
4. The minimum pull force for this board-in terminal does include both the insulation and conductor crimps.
5. To achieve the conductor crimp height (D dimension in Figure 1) for 22 and 24ga wire, a 0.25mm (.010") thick shim is required if your crimp press is not equipped with adjustable shut height. This shim is not supplied with the applicator. The shim should be located between the Ram and the Conductor Punch. See Figure 2.

**PARTS LIST**

<b>Mini-Mac Applicator 63893-4300</b>				
<b>Item</b>	<b>Order No</b>	<b>Engineering No.</b>	<b>Description</b>	<b>Quantity</b>
<b>Perishable Tooling</b>				
	63893-4370	63893-4370	Tool Kit (All "Y" Items)	REF

** Available from an industrial supply company such as MSC (1-800-645-7270).				

### Assembly Drawing

Figure 4

● **Wire Hold Down Assembly**

The wire hold down spring is assembled onto the outside diameter of the conductor bushing.

The location of the spring on the outside diameter of the bushing should be flush with the bushings surface edge as shown. There is a clearance groove provided on the punches for the spring to fit between. See Figure 3.

Figure 3

**NOTES**

1. Molex recommends an extra perishable tooling kit be maintained at your facility.
2. Verify tooling alignment by manually cycling the press and applicator before crimping under power. Check that all screws are tight.
3. Slugs, terminals, dirt, and oil should be kept clear of work area.
4. Wear safety glasses at all times.
5. For recommended maintenance refer to the Mini-Mac Manual.

**CAUTION:** This applicator should only be used in a press with a shut height of 135.80 mm (5.346"). Tooling damage could result at a lower setting

**CAUTION:** To prevent injury, never operate this applicator without the guards supplied with the press or wire-processing machine in place. Reference the press or wire processing manufacturer's instruction manual.

**CAUTION:** Molex crimp specifications are valid only when used with Molex terminals, applicators and tooling.

**Contact Information**

For more information on Molex application tooling please contact Molex at 1-800-786-6539.
