

LVO-MCL-26-F

Ruland LVO-MCL-26-F, 26mm One-Piece Shaft Collar with Clamping Lever, Steel Collar with Zinc Plated Lever, 48mm OD, 15mm Width

Description

Ruland LVO-MCL-26-F is a one-piece quick clamping shaft collar with clamping lever with a 26mm bore, 48mm OD, and 15mm width. It is made from MCL-26-F and LF45-CL-M6:18-ZS. The clamp style design does not mar the shaft, is easy to remove, and is indefinitely adjustable. The threaded stud on the lever is used in place of standard collar hardware. When combined, the two parts create a shaft collar that requires no tools to install, remove, or reposition and is ideally suited for packaging, printing, and other applications where frequent setup changes and adjustments are needed. Once the lever is installed in the shaft collar, users simply turn the lever until they meet their desired torque. The adjustable lever can be reposition by the user without the loss of holding power by lifting the handle and twisting it 40° to lock it in a new position. This allows for use in space constrained environments where 360° rotation is not possible to fully seat the lever. MCL-26-F is made from 1215 lead-free steel with a black oxide finish. LF45-CL-M6:18-ZS has a zinc plated steel handle and stainless steel threaded stud. This material combination allows for a durable quick clamping and release component with relatively high holding power that is suitable for most industrial applications. The lever is orange for safety and ease of identification. MCL-26-F is manufactured by Ruland and LF45-CL-M6:18-ZS is manufactured by Otto Ganter. LVO-MCL-26-F is RoHS3 and REACH compliant.
