PRODUCT CHANGE NOTIFICATION

Notification No: cn009717

Date: 5-12-2015

Change Information

For Notification Only

Product Change Class: D

Description of Change:

GE has implemented a minor change to the assembly process of CP2725AC54TEZ commcode CC109149423. The change increments the series number from 2:1 to 2:1A.

The following actions are included in this change

- 1) Change to the assembly documentation used on the factory floor
 - 2) Changes a fixture used in assembly that assures the proper placement of the AC fuse
 - 3) Adds RTV glue to fix the location of the fuse so that it does not move during final assembly
 - 4) Add spot conformal coating to a small section of the main board to prevent potential electrical issues caused by harsh environmental conditions where external debris (heavy dust/dirt) can enter.
- These changes take effect immediately. Samples are available. Please contact your GE rep if you have questions about this change.

Estimated Implementation Date: 2015-08-12

Material Affected

Operation	Old Comcode	Old Part Number	New Comcode	New Part Number	New Qty	New Assy	BD Ref
-----------	-------------	-----------------	-------------	-----------------	---------	----------	--------

Products Affected

Product Type: AC-DC Rectifier

Affected Product:

CC109149423 CP2725AC54TEZ_RECTIFIER
