

Product Lifetime Purchase Notice – ANTUSB2-ANT

Oct 25, 2013

Dear customers,

Dynastream Innovations Inc. appreciates your adoption of ANT as the solution for your system. We pledge to support your product ordering efforts and invite your feedback.

As a result of our continuous improvement efforts, the ANTUSB-m, a new generation ANT USB stick has been released for production early this year and is now available through the distribution channel. ANTUSB-m offers enhanced ANT functionality and miniature size to enable an improved consumer experience. With the market adoption of ANTUSB-m, we examined the current ANT USB2 portfolio of ANTUSB2-OEM and ANTUSB2-ANT, and have decided to discontinue the ANTUSB2-ANT option. Customers of ANTUSB2-ANT have choices to either switch to ANTUSB2-OEM or ANTUSB-m.

ANTUSB2-OEM and ANTUSB2-ANT are exactly the same, except for product printing. ANTUSB-m shares the same software driver as ANTUSB2, but has a different USB PID. If you decide to start using ANTUSB-m, it is recommended a testing is conducted to ensure compatibility or the software is updated to take the PID of ANTUSB-m

Given this transition plan and recent ANTUSB2-ANT order history, please note that Dynastream will discontinue the ANTUSB2-ANT on **Oct 25, 2013** and the obsolete process has started as stated below.

In an effort to satisfy any requirements you may have, Dynastream is offering a non-cancelable and non-returnable lifetime buy for ANTUSB2-ANT stick. The lifetime buy order must be received on or before **Dec 31, 2013**, and all shipments will be made prior to **Feb 28, 2014**.

Please contact us as soon as possible to review any anticipated ANTUSB2-ANT requirements, including expected dates and estimated quantities.

If you have any questions or need additional information, please contact your local distributors or ANT sales support.

Best Regards,

Thomas Zhao

Sr. Product Manager
