APEM EOL announcement

Re: A01ES Series Emergency Stops

Due to a change in global safety standards, APEM's A01ES Series of emergency-stop switches has been upgraded to the A01ESD series. This product complies with the latest in safety standards for E-stops (DEMCO EN60947-5-5). The A01ES series will be discontinued and replaced with the A01ESD. The change affects the following part numbers:

- A01ES – to be replaced with A01ESDM
- A01ESSP3 - to be replaced with A01ESDSP3
- A0154B - to be replaced with A0154BD
- A0150B - to be replaced with A0150BD

In addition to the safety compliance we have also enhanced the feel of the actuation and designed a few new actuator options. Please see the attached specification for more details.

Last-time buy, NCNR purchase orders will be accepted until August 31, 2016 for deliveries no later than October 28, 2016.

Regards,

Chris DoVale
