# WEB APPLICATION KIT FOR MULTITECH CONDUIT®

*You can create customer-ready web applications to remotely monitor sensor data on phones, tablets, laptops and PCs in as little as one day. No coding is needed.*

## THE CHALLENGE
## CREATING IOT APPLICATIONS

You want to create your IoT solutions quickly to increase sales and be competitive in the market. You want to turn your engineering projects into secure and scalable enterprise applications. Creating and deploying IoT solutions from concept to successful full-scale deployment can be a time consuming and costly process requiring software developers and database engineers.

## THE SOLUTION - REMOTEAWARE™
## AND MULTITECH CONDUIT®

The New Boundary Technologies RemoteAware IoT application service is a fully hosted web-based application service that is ready in one day and requires no coding or IT resources.

RemoteAware has built in support for MultiTech Conduit®, a programmable IoT gateway available in several configurations to support a broad range of wired and wireless sensors.

MultiTech DeviceHQ® (IoT Device Manager) makes it easy to remotely manage, configure and update Conduit® gateways in the field.

*Monitor any asset, in any industry*

## Key Features

**Rapid Application Development:** Create your web application in as little as 1 day

**No Coding Required:** No programming or web development needed

**Robust and Field Proven:** We've been a leader creating remote monitoring solutions for over 35 years.

**Real-Time Monitoring:** Instant visibility to the location and status of all your assets.

**Single-pane-of-glass Dashboard:** Add sensors from multiple assets and live video in a single dashboard.

**Easy to Customize:** Create personalized dashboards without programmers or web developers.

**User-friendly Interface:** RemoteAware is very easy and intuitive to use with a common interface on phone, tablet, laptop and PC.

**Automatic Alerts:** Receive immediate text and email alerts when your assets need attention.

**Built-in Map Views:** See all your assets on maps at a glance.

**Easy to Scale and Deploy:** Scale to monitor thousands of assets.

**Custom Reports:** A rich set of built-in reports is included.  Reports can be customized for your business.

**Data Security:** Secure data communication protocols, built-in roles-based user security, and state-of-the-art secure hosting ensure your data is secure from end-to-end.

**Hardware and Communication Independent:** Support for Ethernet, Wi-Fi, Cellular, LPWAN and Satellite connections to the Internet.

**Easy API Integration:** Integrate RemoteAware data with back-office and analytics applications.

**Two-way Communications Service:** Monitor and control your assets.

**Cloud Hosted:** No IT infrastructure or expertise required.

**Customization:** Customization is available to meet specific requirements.

**Private-label Branding Available:** Deliver your application branded for your company.

RemoteAware Web Applications

# REMOTEAWARE WEB APPLICATION KIT

## MONITOR ANY ASSET IN ANY INDUSTRY

- Agriculture
- Manufacturing
- Water and Wastewater
- Food and Beverage
- Chemical and Industrial
- Energy
- Oil and Gas
- Smart City
- Asset Tracking
- Cold Chain Monitoring
- Healthcare
- Transportation and Logistics

**The RemoteAware Web Application Kit lets you quickly create your field-ready enterprise IoT web application. It includes 90 days access to the RemoteAware Application Service for testing before you deploy your solution**

## THE REMOTEAWARE WEB APPLICATION KIT INCLUDES:

- Cloud-Hosted Web Application for testing and demonstrations
- Database configuration for your application
- Scene Builder to create personalized dashboards
- Webinar-based training

- 90 Days Access to RemoteAware Application Service
  - o Monitor up to 10 assets with up to 100,000 readings per asset per month
  - o Service begins when data is first received from your assets
- Telephone and e-mail technical support
- Access to RemoteAware Integration APIs

*Hardware, Cellular communications, SMS message charges and Device Management cloud services, if applicable, are not included.
