Re DSP30-24/277A Part Number Change

To whom it may concern,

There will be a change to the TDK-Lambda part number for the DSP30-24/277A DIN rail power supply, effective October 1st 2018. The new part number is DSP30-24/277A2, reflecting a revision change following a semiconductor part end of life. There are no changes to the specification and the models are form, fit and function.

Current Part Number	New Part Number
DSP30-24/277A	DSP30-24/277A2

Sincerely,

A handwritten signature in black ink, appearing to read 'Tom Tillman', enclosed within a hand-drawn oval.
