Ref : KSC XA – Membrane colour

To: Customer contacts

Subject: Product Information – KSC XA series

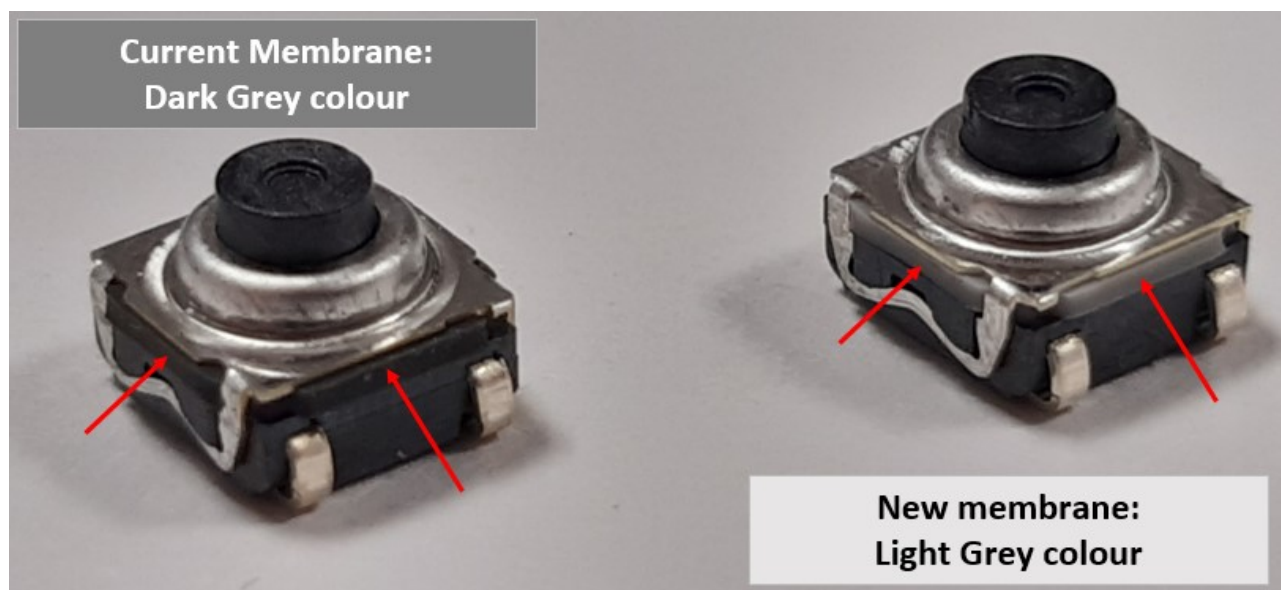

Dear Customers,

C&K is using many different membranes to produce KSC family switches.

Original choice of the colour of the membrane for KSC XA series (Dark Grey) is very close to another colour membrane dedicated to other products.

In order to avoid any risk of error, the colour of the membrane will change for KSC XA series, the colour will be lighter:

- Current membrane: Dark Grey colour
- **New membrane: Light Grey colour**

This change of the grey nuance is purely cosmetic, so:

- it does not affect the product and its performance
- the documentation (IMDS, specification, drawing, 3D models) remains identical.
- There is no change of Designation or Part Number

KSC XA P/Ns affected:

Designation	Part Number
KSC XA 35 J LFS	Y30H687A1FP
KSC XA 40 J LFS	Y30H787A1FP
KSC XA 55 J LFS	Y30HF87A1FP
KSC XA 68 J LFS	Y30HQ87A1FP
KSC XA 96 J HD LFS	Y30HE87A1FP
KSC XA 96 J LFS	Y30HR87A1FP
KSC6XA 30J LFS	Y30KG86B1FP

Date of application: First deliveries will occur **mid-May 2022**

According to our C&K internal procedure, this colour change is considered as a cosmetic change without any impact, and which require no Part Change Notification (PCN).

We remain at your disposal for any additional information.

Thank you for your comprehension.

Yours Sincerely

Régis CLEMENT
