Installation Notes

Installation

Clipping a wire harness support into the marker slot.

Inserting a cable into the wire harness support.

2 x group marking on top

1 x terminal block marking at the bottom

Subject to changes. Please also observe the further product documentation!

Terminal blocks for matrix patching with wire harness supports:

For 5 mm wide double-potential terminal blocks, two 3-conductor through terminal blocks are offered in one insulating housing on one level. This achieves a width of just 2.5 mm (0.098 inch) versus standard through terminal blocks. On each side of the terminal block are marker slots for WAGO WMB Inline markers. Via the available accessories, these terminal blocks can also be used as 4-conductor disconnect terminal blocks or potential multipliers.

The WAGO wire harness supports are pushed into the terminal blocks (approx. every 8th unit) to form an additional "cable-duct" above the wiring level of the terminal blocks. The two marker slots on the top may be used for group marking, while the lower slot is used for marking the terminal block.

Subject to changes. Please also observe the further product documentation!
