This RJ11 pass-through breakout board provides a convenient method of accessing all the contacts of a 6P6C connector. Each of the 6 connections are brought out to a prototyping area to enable in-circuit modifications as well as easy probing and diagnostics. The prototyping grid has a standard 0.1" pattern to enable compatibility with a variety of components. The DIN clips on this model allow it to be easily used with a 35mm DIN rail system, making this board perfect for industrial applications.
