

## YOUR ZIGBEE & THREAD INTEGRATION PARTNER

Dear Sheri,

As part of MMB Networks' ongoing product review process and commitment to continuity of supply across our growing platform of solutions we will be changing the status on older and low volume products to EOL (End of Life) or NRND (Not Recommended for New Designs).

In most cases, MMB can offer replacements that will run the same firmware and offer footprint compatibility, please talk with your account manager if you have questions about the compatibility of the suggested products.

If you are currently in development on any product listed as NRND (Not Recommended for New Designs) please contact your account manager or 'sales@mmbnetworks.com' to discuss options to migrate to our latest generation of solutions. Devices listed as NRND will not become obsolete as a result of this notification.

Products targeted for end-of-life are available for a last time buy purchase prior to being made obsolete. To facilitate your transition MMB Networks will make available evaluation samples of recommended alternate solutions.

MMB is committed to providing you the necessary product support during this transition. Please review the below timelines to ensure minimal disruption to your supply chain operations while transitioning to an alternate solution:

Date	Highlight
March 15, 2017	Last time order
September 15, 2017	Last MMB Shipment
