Description of Changes
Please be aware of an upcoming feature change to the listed part numbers. Before: SDL2.5 TPA fall off from the cap housing during the transportation. After: No TPA fall off during the transportation. Reference performance test data: Parts cleared Drop test requirement.

- The TPA for SDL 2.5 water proof connector. It is loaded from the front side of cap housing.
- Due to size limitation, current TPA is weak and the overlap between TPA lock and cap housing is only 0.1mm.
