Dear Customer,

**Re: Product Change Notification for Harwin product.**

In order to improve our manufacturing processes relating to Gecko-SL Cable Backshells, we are changing the method by which the two halves are clamped together. The current design uses short screws which screw directly into the backshell to hold the two halves together, one on each side. To improve manufacturing, we are no longer able to add the additional screw thread directly into the backshell half.

The new design will include 2 short screws and 2 hexagonal nuts, which will assemble through clearance holes in the backshell on either side. This will hold the two halves together. The additional nut is the same as the board mount nut, available separately as [G125-4500000B](#).

As current stocks are exhausted, the new design will appear. We are unable to commit to a specific changeover date for the stock. The following parts will be affected:

G125-9640600	G125-9641000	G125-9641200	G125-9641600
G125-9642000	G125-9642600	G125-9643400	G125-9645000
G125-96406F1	G125-96410F1	G125-96412F1	G125-96416F1
G125-96420F1	G125-96426F1	G125-96434F1	G125-96450F1

Unfortunately, we are no longer able to support the previous design.

If you have any further questions regarding this letter, please do not hesitate to contact us.

Yours faithfully,

The Product Change Team
