

Dear Digi-Key customer:

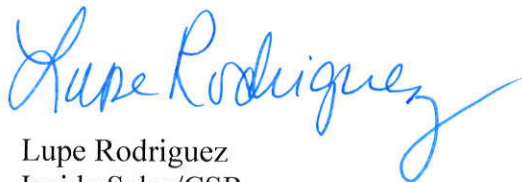

Thank you for purchasing an ACL 395 Resistivity Meter. This letter is to certify that this meter has been calibrated to NIST Standard as shown in the enclosed calibration certificate.

The calibration is good for one year AFTER the purchase date, and not from the date shown on the enclosed certificate. If an updated certificate is required, please call ACL Inc. at 1-800-782-8420 ext.331 or email a calibration request to:

orders@aclstaticide.com.

The ACL 395 serial number and date of purchase will be required to process an updated calibration certificate.

Sincerely,

Lupe Rodriguez
