Using Tips:

1. Make sure the power supply is turned off before installation.

2. Please make sure that the surface is flat, smooth and clean before sticking the light strips on where you use.

3. The light strip, USB adapter and controller are non-waterproof, please keep them away from water or rainy day.

4. When connect the strip lights to any charger for power supply, please choose the charger which output voltage is 5V, otherwise the strip light won't work properly.
