4G LTE Roadmarker

Part No:
RG.02.02.3000W

Description:

Roadmarker Low Profile 4G LTE Cellular Antenna
with CAB.820 cable assembly

Features:

- Low Profile
- 4G LTE Cellular Antenna
- UV and Vandal Resistant PP Enclosure
- IP67 Rated Enclosure
- Diameter: 101.4mm
- Height: 17.6mm
- RoHS & Reach Compliant

1. Introduction

The Roadmarker RG.02 has been designed to be used inside standard raised non-reflective roadmarkers. These are designed for, and installed inside, the low profile “Bott’s dots” that can to be mounted directly on the pavement and therefore the roads.

The Roadmarker uses a high efficiency 4G LTE antenna that can also operate at 3G/2G and NB-IoT/Cat-M bands, if fallback is required.

These antennas exhibit relatively high efficiencies in such small packages and reside in a very low-profile enclosure. They are designed to be mounted directly on the road and pavement just like a standard roadmarker.

Typical Applications Include:

- :: Smart Metering
- :: Remote Monitoring
- :: Security

These antennas have been potted with the epoxy that is traditionally used to secure the roadmarker itself to the ground. There are no air gaps whatsoever inside the new type approved roadmarker with antenna, in order to maintain the mechanical integrity. It is presumed that the standard black epoxy will also be used to install the roadmarker in its final resting place on the ground.

The cable and connector are fully customizable, for further information please contact your regional Taoglas customer support team.
