

PE0302

Evaluation Kit for CMX865A

The PE0302-865A Evaluation Board features the CMX865 DTMF Codec/FSK Combo. Also included is a line interface. The board is fitted with a C-BUS connector allowing the PE0302-865A to be operated by connection to either of the two C-BUS ports on a PE0003 Universal Interface Card, and used with the associated PC GUI software. Alternatively, direct connection is possible between the CMX865A C-BUS and the user's μC development application or emulation system.

Features

- Designed for use with PE0003 universal interface card and PC control software
- On-board supply regulator
- Fully isolated 2-wire line interface (DAA)
- Operates from single 5V dc power supply

Supply Requirement

- 3.3 V

CML Microcircuits Benefits

Faster time to market

Developing proven high performance and field tested ASSP ICs, CML is helping engineers to cope with increasing pressure in delivering shorter project design cycles.

Design flexibility

CML's *FirmASIC*® reconfigurable technology with the use of a Function Image upload enables a single hardware platform to be used for multiple communications systems.

High Quality

With 100% of products being tested before shipping, customers are assured of the highest reliability.

Product Longevity

Designing with CML products, manufacturers are rewarded with longer product life cycles and a stable BOM, ensuring minimum engineering costs and maximum profit.

Low Power

Being at the forefront of low power chip technology, manufacturers can develop smaller equipment with extended battery life.

Superior Support

Internal and field based applications teams worldwide provide focused customer support to ease the development process.
