Item description

Source Code Management and Revision:

The *e!COCKPIT* SVN add-on provides an integrated connection to the software versioning system Apache® Subversion®. SVN is a tool for version and revision control of current or historical versions of documents. This version control system tracks and controls changes to the program source code and other information stored as computer files. It is most commonly used in software development when a team works on the same files. The add-on integrates seamlessly into the *e!COCKPIT* Engineering Software.

Benefits:

- Change logging: Changes can always be traced.
- Compare different revisions.
- Restore old revisions: Accidental changes to files can be undone at any time.
- Archive specific revisions: An older version can always be restored.
- Simultaneously work in several branches of a development project.

Main Functions:

The SVN functions are integrated directly into e!COCKPIT and expand the corresponding menus and icons so that the following properties of the documents are directly visible:

- Object has been added
- Object with conflict
- Object has been deleted
- Object was changed
- Normal object

Subject to changes. Please also observe the further product documentation!

- Object has deleted sub-objects
- Object is ignored during transfer
- External object
- Unversioned object

Functions:

The following functions can be performed via *e!COCKPIT*:

- Import project into Subversion®
- Connect the project archive to Subversion®
- Separate project from Subversion®
- Check out object for editing
- Transfer
- Compare object
- Comparison with HEAD revision
- Comparison with revision
- Comparison with project on server
- Add
- Integration of external files
- Ignore
- Subversion® info
- Show properties
- Show log
- Undo change (to specific revision)
- Update file (to specific revision)
- Merge changes

Subversion® is a trademark of the Apache Software Foundation.

Data
System requirements

Hard disk space	min. 50 MB
Other required software	*e!COCKPIT* version: V1.6.1

Delivery

License type	Single-user license

Subject to changes. Please also observe the further product documentation!

Delivery type	Installation file (download)
License type (note)	A single license allows installation on one computer.
License type (note) (2)	Internet connection may be required for license activation.
Licence Generation	DRM
