

40W multi-current with dip switch Triac Dimmable CC LED driver

(Multi-output current with DIP switch adjustable) (10W,20W,40W,60W available)

■ Features:

- Output constant current
- Range AC input :100-277VAC
- Efficiency up to 80%
- Built-in active PFC function
- Protections: short circuit/over current/over load
- Full protection plastic housing easy installation
- IP20 design for indoor installation/dry&damp location
- Cooling by free air convection
- Dimming function: Triac/phase cut dimming
Work with leading or trailing edge Triac dimmer
(ON key: leading edge; 1 key: trailing edge)
- Strong compatibility, flicker-free dimming
- Suitable for LED lighting and moving sign applications
- UL Listed Class 2, Class P
- 7 years warranty

SP4 安装图

- Input with DG126 terminals 3P: Live Wire AC (L), Neutral Wire AC(N)
- Output LED SEC with DG126 terminals 2P: output Positive (LED+), output negative (LED-). Connected to LED Lamps.
- Suggested wire diameter: Input 0.75-2mm²; Output: 0.5-2mm².

Note: Please make sure you connect these correctly otherwise your product will not function correctly and could be damaged

■ Derating Curve

- To extend their life, please refer to the Derating Curve and derate according to the temperature.

■ Dimming Operation

- Output constant current level can be adjusted through input terminal of the AC phase line(L) by connection a Triac dimmer.
- Usually matching with leading edge and trailing edge dimmer both.

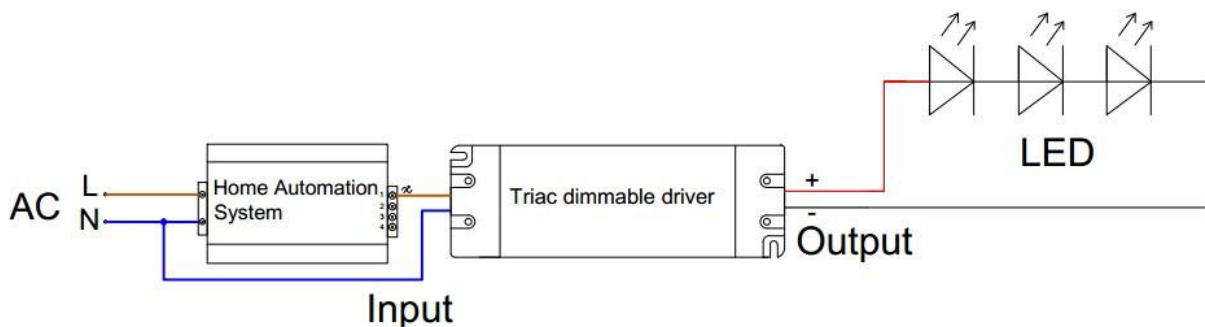

At the input area, you will find dip switch on the terminal.

ON key for leading edge; 1 key for trailing edge. (see right picture)

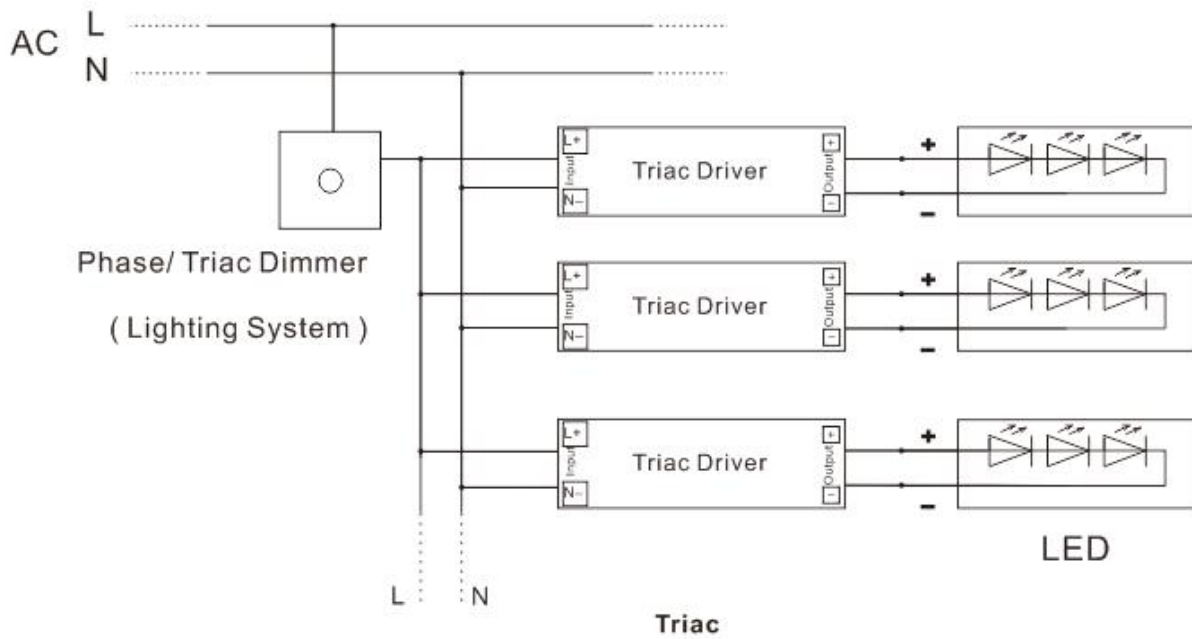

- please try to use the small power dimmer, have access to a wider dimming range, high-power dimmer is difficult to achieve the output current to zero
- please try to use dimmers with power at least 2 times as the output power of the driver.

■ **Instruction:**

- This driver should be installed by qualified and professional person;
- Please make sure the driver is installed with adequate ventilation around it to allow for heat dissipation.
- Ensure that wiring is correct before test in order to avoid light and power supply damage;
