Product End-of-Life Notification

RJModem™ Embedded Analog Modems

Date: April 25, 2018

I. Summary

Due to a critical component end-of-life, the status of the RJModem™ family of embedded analog modems are changing status from **Near-End-of-Life (NEOL) to End-of-Life (EOL)** effective immediately.

While there are no direct replacement models, MultiTech offers a full line of embedded analog SocketModems that could be designed in as a replacement for the RJModem series. Please consult with your MultiTech sales representative to see which model is best suited to meet your needs.

Now may be the time to review your connectivity roadmap and transition strategy. Analog data line costs continue to rise and line quality has been declining. MultiTech offers a broad portfolio of embedded modems and devices that provide a seamless migration to all major Cellular, Low-Power Wide Area & Personal Area Networks. Learn more.
