

## Sensor and motion algorithm software expansion for STM32Cube

### Features

- Complete software to build applications using the following sensors:
  - temperature and humidity sensors: [HTS221](#) for [X-NUCLEO-IKS01A2](#) and [X-NUCLEO-IKS01A3](#)
  - pressure sensor: [LPS22HB](#) for [X-NUCLEO-IKS01A2](#), [LPS22HH](#) for [X-NUCLEO-IKS01A3](#) and [LPS33HW](#) via DIL24 interface
  - temperature sensor: [STTS751](#) for [X-NUCLEO-IKS01A3](#)
  - motion sensors: [LSM303AGR](#) and [LSM6DSL](#) for [X-NUCLEO-IKS01A2](#), [LIS2MDL](#), [LIS2DW12](#) and [LSM6DSO](#) for [X-NUCLEO-IKS01A3](#), and [ASM330LHH](#), [IIS2DLPC](#), [IIS2MDC](#), [ISM303DAC](#), [ISM330DLC](#), [LIS2DH12](#) and [LSM6DSOX](#) via DIL24 interface
- Several examples to show the innovative inertial and environmental sensors
- Sample application to transmit real-time sensor data to a PC
- Compatible with the [Unicleo-GUI](#) graphical user interface to display sensor data and configure outputs
- Sample implementation available on the [X-NUCLEO-IKS01A2/X-NUCLEO-IKS01A3](#) boards connected to a [NUCLEO-F401RE](#), [NUCLEO-L152RE](#), [NUCLEO-L476RG](#) or [NUCLEO-L073RZ](#) development board
- Advanced motion libraries with sample applications
- Package compatible with [STM32CubeMX](#), can be downloaded from and installed directly into [STM32CubeMX](#)
- Easy portability across different MCU families, thanks to [STM32Cube](#)
- Free, user-friendly license terms

### Description

The [X-CUBE-MEMS1](#) expansion software package for [STM32Cube](#) runs on the STM32 and includes drivers that recognize the sensors and collect temperature, humidity, pressure and motion data.

The expansion is built on [STM32Cube](#) software technology to ease portability across different STM32 microcontrollers.

The software comes with a sample implementation of the drivers running on the [X-NUCLEO-IKS01A2/X-NUCLEO-IKS01A3](#) expansion boards connected to a featured [STM32 Nucleo](#) development board.

The software provides sample applications and advanced motion libraries ([MotionAC](#), [MotionAR](#), [MotionAT](#), [MotionAW](#), [MotionCP](#), [MotionEC](#), [MotionFA](#), [MotionFD](#), [MotionFX](#), [MotionGC](#), [MotionGR](#), [MotionID](#), [MotionMC](#), [MotionPE](#), [MotionPM](#), [MotionPW](#), [MotionSD](#), [MotionSM](#), [MotionSP](#), [MotionTL](#) and [MotionVC](#)).

## 1 Detailed description

### 1.1 What is STM32Cube?

STM32Cube™ is an STMicroelectronics initiative that helps you reduce development effort, time and cost. STM32Cube covers the STM32 portfolio.

STM32Cube version 1.x includes:

- STM32CubeMX, a graphical software configuration tool that allows the generation of C initialization code using graphical wizards.
- A comprehensive embedded software platform specific to each series (such as the STM32CubeF4 for the STM32F4 series), which includes:
  - the STM32Cube HAL embedded abstraction-layer software, ensuring maximized portability across the STM32 portfolio
  - a consistent set of middleware components such as RTOS, USB, TCP/IP and graphics
  - all embedded software utilities with a full set of examples

### 1.2 How does this software complement STM32Cube?

This software is based on the STM32CubeHAL hardware abstraction layer for the STM32 microcontroller.

The package extends STM32Cube by providing a board support package (BSP) for the sensor expansion board. The drivers abstract the hardware low-level details and allow the applications to access sensor data in a hardware-independent manner.

The package includes several sample applications that the developer can use to start experimenting with the code. A sample application has been developed to enable sensor data logging on a PC; a Windows PC utility (Unicleo-GUI) is available on [www.st.com](http://www.st.com), to allow the developer choose among various sensors available on the expansion board and set the appropriate delay/interval among consecutive data points.

Sensor data can be logged to a file selected by the user.

The package is compatible with STM32CubeMX. It can be downloaded from and installed directly into STM32CubeMX, as detailed in the in UM1718 (freely available on [www.st.com](http://www.st.com)).

## Revision history

**Table 1. Document revision history**

Date	Revision	Changes
07-Nov-2014	1	First release.
19-Dec-2014	2	Modified the document title, features and description text on the cover page. Added Section 1: Detailed description.
17-Jun-2015	3	Updated: Title on the cover page.
20-Oct-2015	4	Updated: Overall system architecture, features and description on the cover page.
21-Dec-2015	5	Updated cover image
22-Dec-2015	6	Updated How does this software complement STM32Cube?
04-Nov-2016	7	Updated cover image Updated hardware compatibility information for X-NUCLEO-IKS01A2 expansion board and associated sensors.
20-Mar-2017	8	Updated cover image, features, description and How does this software complement STM32Cube?
20-Sep-2017	9	Updated cover page image and description.
14-Nov-2017	10	Updated cover page title.
09-Jul-2018	11	Updated cover page image, features and description.
20-Dec-2018	12	Updated cover page features and Section 1.2 How does this software complement STM32Cube?
18-Feb-2019	13	Updated cover page image. Added X-NUCLEO-IKS01A3 expansion board compatibility information.
05-Jun-2019	14	Updated cover page image, features and description.
