

White LED Keyring Torch

Introduction: The fully assembled torch is a simple push button LED torch ideal for putting on a keyring.

The board is powered from a CR2032 coin cell which provides enough power for a minimum of 24 hours continuous usage. There are M2 and M3 mounting holes to provide different options when designing a case. One of the M3 holes is ideal for attaching the torch to a keyring.

Specification

Operational Supply	3V via CR2032 Coin Cell
Forward Current	15mA at 3V
Number of LEDs	1 White LED (Side View)
Luminous Intensity	230mCd
Viewing Angle	120°
Mounting	2 x M3 and 2 x M2
