

## MT10:12-SWMB-M6-AN

Ruland Swivel Mounting Block, Width/Height 20mm, Length 38mm, Black Anodized Aluminum

### Description

Ruland MT10:12-SWMB-M6-AN is a cross pattern swivel mounting block with an M6 tapped center hole, M4 threads in the cross, a 10mm base height, a 20mm width and height, and a 38mm overall length. It is designed to fit with Ruland modular mounting system swivel components that begin with MT10 or MT12. MT10:12-SWMB-M6-AN is aluminum with a black anodized finish and screws are 304 stainless steel for added corrosion resistance when compared to unplated types. This swivel mounting block is used to support brackets for mounting sensors, screens, reflectors, plexiglass machine guards, and other industrial components. It has a cross pattern allowing the user to mount with a single M6 screw through the center of the bracket or with multiple M4 screws in the arms of the cross. The use of a cross pattern prevents the bracket from rotating if the mounted component has high mass or will have force applied to it such as a screen. An MT10:12-SWALK-M5-20 adjustable clamping handle can be used to rapidly reposition MT10:12-SWMB-M6-AN without the use of tools. It is manufactured by Otto Ganter, inventoried by Ruland, and RoHS3 compliant.
