

CPI2-B1-CY8C – universal programmer

CPI2-B1-CY8C in-system device programmer

This **preloaded** device programmer bundles a standard **CPI2-B1** single-channel device programmer with a device library license that enables programming of a variety of Cypress **CY8C2xxx** & **CY8C3xxx** devices currently supported by Phytion. See a list of the preinstalled device library licenses in the matrix below. Plus, as any other preloaded device programmers, this bundle includes the free **Basic Device Library** license.

The **CPI2-B1-CY8C** device programmer will automatically enable programming of all new devices belonging to the Cypress **CY8C2xxx** & **CY8C3xxx** devices libraries below that Phytion will support in the future – no new purchase is required.

To expand the **CPI2-B1-CY8C** device list, additional **CPI2-D-xxxx** device library licenses, not included in the **CPI2-B1-CY8C** bundle, can be purchased and installed by the programmer's user.

Bundled licenses	Description
Basic License	Free Basic Device Library license that supports all serial flash memory devices and selected 8- and 16-bit microcontrollers from different manufacturers
CPI2-D-CY8C3	Cypress CY8C2xxx & CY8C3xxx device library license
