

Same Product. Less Packaging. A Greener Tomorrow.

Dear Price List,

As part of Spectris's [global sustainability initiative](#), Red Lion is undertaking several initiatives to reduce our carbon footprint. One initiative includes reducing overall waste and dependency on paper packaging products. To accomplish this, we evaluated our packaging processes and materials, and the resulting packaging size changes may impact your stock piling requirement. We are informing you of this change so that you can make any necessary adjustments.

The change involves switching from our current packaging material to a Korrvu[®] solution, which uses smaller, recyclable rightsized boxes and a strong film to surround the product, keeping it in place and protecting it from shock and vibration during shipping. This change will help lower our carbon footprint. The first products to reflect these new packaging changes will be our PAX panel meters and PM-50 modules and accessories.

All products affected by the change are outlined in the attached spreadsheet. The new package will begin to ship on or around **May 1, 2022**. We are committed to a better tomorrow and these actions will support our sustainability efforts to make this happen.

Sincerely,

Kevin Good
Vice President, Global Operations
