

SRA #312 NO-CLEAN LIQUID FLUX**Product Description**

SRA #312 flux was designed for soldering high quality electronic printed circuit boards (PCBs), such as, through-hole, mixed technology, and surface mount assemblies while eliminating the need for a post cleaning operation.

If removal of the residue is needed though, it can be cleaned with warm water.

Key Features

- Superior fluxing ability with instant wetting.
- Free of any halides, resin, or rosin.
- Contains No-Clean, Low Solids Flux
- Suitable for automotive, computer, telecom
- Compatible with Lead and Lead-Free Solders
- For rework and touch-up of SMT, SMD, and through hole solder joints
- Residues are Non-Corrosive and Non-Conductive.
- Flux conforms to IPC-ANSI-J-STD-004, Type ORL0.
- This product is RoHS Compliant

Availability

- **FLS312-100ML** – 100mL Bottle
- **PEN-NC** – 10mL Refillable Flux Pen
- **PEN-NC-SET** – 10mL Flux Pen with 5 Refills
- **REFILL-NC** – 50mL Bottle for Flux Pen Refill
