

## Maintain 4G Connectivity During AT&T 3G Sunset

As you might recall, many wireless network providers within the United States have made the decision to sunset their existing 3G networks in favor of newer and faster 5G service.

Beginning **Tuesday, February 22, 2022**, AT&T will sunset its 3G network. As a result of this event, some older 4G-supported devices may be impacted.

If you are using any of our FlexEdge™ devices on the AT&T network, please visit the link below to ensure uninterrupted connectivity during this transition. For further questions, please contact our support team by emailing them at [support@redlion.net](mailto:support@redlion.net). Thank you for your continued support of Red Lion Controls!
