

Product Overview

LV8746V: PWM Constant-Current Control Stepper Motor Driver

For complete documentation, see the data sheet.

The LV8746V is a stepper motor driver corresponding to the Quarter-step excitation drive that the selection of CLK-IN input and a parallel input is possible. It is ideally suited for driving stepper motors used in office equipment and amusement applications.

Features

- Low on resistance (upper side : 0.84Ω ; lower side : 0.7Ω ; total of upper and lower : 1.54Ω ; Ta = 25°C, IO = 1A)
- Excitation mode can be set to Full-step, Half-step Full torque, Half-step, or Quarter-step
- Motor current selectable in four steps
- Output short-circuit protection circuit (selectable from latch-type or auto-reset-type) incorporated
- CLK-IN input and a parallel input can be selected
- PWM current control stepper motor driver incorporated.
- BiCDMOS process IC
- CLK-IN input and a parallel input can be selected.
- Unusual condition warning output pins
- No control power supply required

For more features, see the data sheet

Benefits

- High Efficiency
- Various Step Adjustment Available
- Low Consumption
- Safety Design
- Various Input Type Available

Applications

- Stepper Motors
- Computing & Peripherals
- Industrial

End Products

- Printers
- Flatbed Scanner
- Inkjet Printer
- Multi-Function Printer
- Document Scanner
