

Adafruit PyPortal Desktop Stand Enclosure Kit

PRODUCT ID: 4146

PyPortal is our easy-to-use IoT device that allows you to create all the things for the “Internet of Things” in minutes. Create little pocket universes of joy that connect to something good.

And now that you've made a cool internet-connected project with the Adafruit PyPortal, you will want to show it off. Instead of having it lie on a table or taped to a box, try this gracious and elegant enclosure.

Prevent inter-dimensional monsters and gremlins, or accidentally-spilled coffee from wrecking your IoT project with the PyPortal Enclosure Kit! Expertly crafted and laser-cut, this enclosure will give your PyPortal a minimalist and elegant look.

Parts included:

- 6 x Acrylic Cutouts
- 2 x M3 12mm nylon screws
- 4 x M3 18mm nylon screws
- 6 x nylon hex nuts

These come with paper backings on both sides (it protects the acrylic while laser cutting and shipping). You'll need to peel those off before assembly.

For assembly instructions, check out our guide page

Adafruit PyPortal is not included! This is just the enclosure part, you can pick up a PyPortal here.
