2 x AA Battery Holder with Premium Jumper Header Wires

PRODUCT ID: 3858

We've got battery holders for all sorts of needs and projects! Waterproof? Here ya go. With an on/off switch? Easy peasy. Here's our latest addition in classy Adafruit black: 2 x AA Battery Holder with Premium Header Wires. What's so special about 'em? Well you can plug them right into a breadboard! No need to fight with those skinny stripped wires you normally get. Of course, you can always still solder them into a PCB.
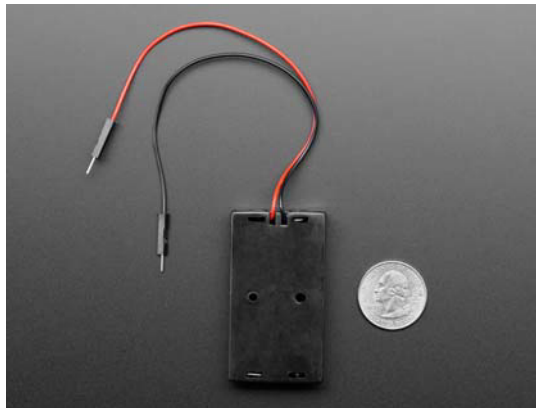

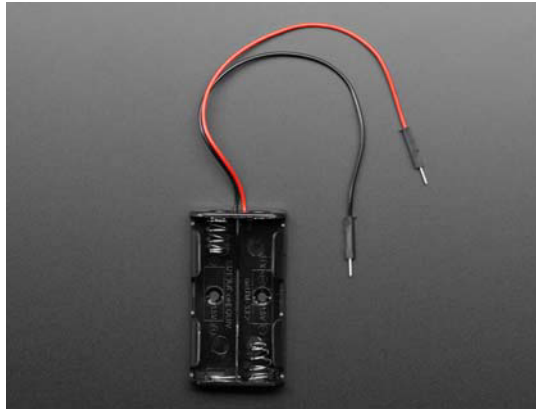

Use with any alkaline or rechargeable batteries for about 2.5V to 3V output

Looking for an option that won't leave your batteries exposed? We've got lots of battery holders with snap-on covers and the like

AA Batteries are not included, but we have them in the store!
