Item description

Female connector/socket WINSTA® MIDI with protection against mismatching

Reliably secure installations through distinctive connection technology: The WINSTA® MIDI female connector/socket. Our large selection of pluggable PCB connectors with different insertion directions and operating variants offers you the perfect solution for your application at all times. For greater security in electrical installations, the pcb connector is provided with mechanical protection against mismatching. B coding enables the WINSTA® MIDI pcb connectors to be used for application control in automation, mechanical engineering and robotics. This pcb connector can be employed for a voltage load of up to 25 A. Thus, pcb connector can also be used for high power loads. The WINSTA® MIDI Pluggable Connection System with Push-in CAGE CLAMP® spring pressure connection technology facilitates precise electrification. Due to the built-in test slot, it is possible to check connections even when they are plugged in. That saves time and reduces installation labor and costs.

Push-in CAGE CLAMP® spring pressure connection technology – pluggable installation instead of laborious screw connections!

The WINSTA® Pluggable Connection System is perfectly tailored to the strict requirements of building installation. It makes electrical installation pluggable, and thus faster, more reliable, and error-free. Use of this pre-assembled system reduces time spent on assembly and installation errors at the construction site. Now you can also lower installation expenses without compromising safety and quality: The WINSTA® MIDI pcb connector with protection against mismatching reduces the need for servicing and prevents unnecessary downtime.

-
- protection against mismatching eliminates errors
- for automation controllers
- with B coding for use in process automation, such as lighting technology
- quick replacement of defective units during ongoing operation

Mechanical Data

Application	Control technology
Coding	B
Variable coding	Yes
Marking	U- S U+ X/Y
Potential marking	U- S U+ X/Y
Mating force of a plug-in connection	approx. 20 ... 70 N (depending on pole number)
Retention force of a plug-in connection	Locked: > 80 N
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)
Number of mating cycles	200, without resistive load
Design	angled

Plug-in connection

Contact type (pluggable connector)	Female connector/socket
Connector (connection type)	for PCB
Mismating protection	Yes
Note on mismating protection	All <i>WINSTA</i> [®] components are 100% protected against mismating when: a.) plugging different numbers of poles b.) plugging while rotated 180 c.) plugging while laterally staggered d.) plugging one pole
Mating direction to the PCB	0°
Locking lever	yes
Locking of plug-in connection	locking lever
Note on locking system	All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

PCB contact

PCB contact	THT
Solder pin arrangement	2 in-line solder pins/pole
Number of solder pins per potential	2
