110 WATTS

MULTI OUTPUT AC-DC

FEATURES:

- Compact 3.0" x 5.0" x 1.25" Size
- 3 Year Warranty
- Universal 85-264V Input
- Dual, Triple or Quad Outputs
- 87% Peak Efficiency
- 85% Average Efficiency
- <1W No Load Input Power
- IEC 60601-1 3rd ed. Medical Cert.
 IEC 62368-1 2nd ed. Certification
- IEC 60601-1-2 4th ed. EMC
- Class B Emissions per EN55011/32
- 0-70°C Operating Temperature
- RoHS Compliant Optional Chassis/Cover

CHASSIS/COVER

ORDERING INFORMATION

Consult factory for alternate output configurations. Consult factory for positive, negative or floating outputs.(13) Please specify the following optional features when ordering:

CH - Chassis CO - Cover

OVP - Overvoltage Protection I/O - Isolated Outputs

All specifications are maximum at 25°C/110W unless otherwise stated, may vary by model and are subject to change without notice.

RN-110 OUTPUT SPECIFICATIONS

OUTF Output Power at 50°C ₍₁₎ (See Derating Chart)	110W	85-264 VIN

GRN-110 MULTI MECHANICAL SPECIFICATIONS

ALL DIMENSIONS IN INCHES (mm)

CONNECTOR SPECIFICATIONS

APPLICATIONS INFORMATION

- 1. Each output can deliver its rated current but Total Output Power must not exceed 110W.
- 2. Generally, adequate cooling is provided when semiconductor case temperatures do not exceed 70°C rise and transformer temperature does not exceed 60°C rise at any specified ambient temperature.
- 3. Sufficient area must be provided around power supply to allow natural movement of air to develop in convection-cooled applications.
- This product is intended for use as a professionally-installed component within information technology, industrial, and medical equipment and is not intended for stand-alone operation.
- 5. Minimum load is not required for reliable operation; however, a 10% load may be required on Output 1 when loading Outputs 2, 3 or 4.
- 6 This product includes only one fuse in the input circuit. In consideration of clause 8.11.5 of IEC 60601-1-1:2005, a second fuse may be required in neutral conductor of the end product.
- 7. Peak-to-Peak Output Ripple and Noise is measured directly at the output terminals of the power supply, without the use of the probe ground lead or retractable tip (tip-and-barrel method), 20 MHz bandwidth.
- 8. This product was type-tested and safety-certified using the dielectric strength test voltages listed in Table 6 of IEC60601-1:2005. In consideration of clause 8.8.3, care must be taken to insure that the voltage applied to a reinforced insulation does not overstress different types and levels of insulation. Primary and secondary-to-ground capacitors may need to be disconnected prior to performing a dielectric strength type test on the power supply or the end product. It is highly recommended that the DC test voltage listed in DVB.1, annex DVB of UL60601-1 1ST Edition are not exceeded during a production-line dielectric strength test of the assembled end product. Please consult factory for further information.
- This power supply has been safety-approved and final-tested using a DC dielectric strength 9 test. Please consult factory before performing an AC dielectric strength test.
- 10. Maximum screw penetration into bottom chassis mounting holes is 0.100 inches. Maximum screw penetration into side chassis mounting holes is 0.188 inches.
- 11. To comply with emissions specifications, all four mounting hole pads must be electrically connected to a common metal chassis. Chassis/Cover option is recommended. Refer to Operating Instructions for additional information.
- 12. Common RF shielding precautions may need to be taken to assure emissions compliance. Refer to Operating Instructions for additional information.
- 13. Optional Output Configuration (consult factory).
 - V2 can be configured positive, negative or floating with respect to V1.
 - V3 can be configured positive or floating with respect to V1.
 - V4 can be configured positive, negative or floating with respect to V1.

TYPICAL EFFICIENCY vs. LOAD

Load (%)

MAX Pout vs. AMBIENT TEMPERATURE/INPUT VOLTAGE

Derating requirements - Derate from 100% load at 50°C to 50% load at 70°C. Derate from 100% load at 90VIN to 90% load at 85VIN. - Derate 10% with Chassis/Cover option.
