1. SCOPE:

THIS SPECIFICATION DEFINES THE ELECTRICAL AND MECHANICAL CHARACTERISTICS OF THE AC TO DC BRUSHLESS MOTOR.

2. CHARACTERS:

UNLESS SPECIFIED, ALL READINGS AND TESTS ARE BASED ON 25°C, 65% RH.

| ITEM | DESCRIPTION |
|---|---|
| NOMINAL VOLTAGE (VAC) | 115/230 VAC (50/60Hz) |
| NOMINAL VOLTAGE RANGE | 100 - 240 VAC |
| MOTOR LOADING INPUT POWER @230VAC(FREE AIR) | 13.0W TYP. Aluminum impeller Ø230, 28°, t=0.7mm |
| INPUT POWER (MAX. LOAD) | 25W MAX. |
| OUTPUT POWER (MAX. LOAD) | 15W MAX. |
| RATED SPEED | 1300±10% R.P.M. |
| INSULATION TYPE | UL: CLASS B |

Application Notice

- 1. Delta will not guarantee the performance of the products if the application condition falls outside the parameters forth in the specification.
- 2. A written request should be Submitted to Delta prior to approval if deviation from the specification is required.
- 3. Please exercise caution when handling fans. Damage may be caused then pressure is applied to the impeller, if the fans are handled by the lead wires, or if the fan was hard-dropped to the production floor.
- 4. Except as pertains to some special designs, there is no guarantee that the products will be free from any such safety problems or failures as caused by the introduction of powder, droplets of water or encroachment of insect into the hub.
- 5. The above-mentioned conditions are representative of some unique examples and viewed as the first point of reference prior to all other information.
- 6. Delta fans without special protection are not suitable where any corrosive fluids are introduced to their environment.
- 7. Please ensure all fans are stored according to the storage temperature limits specified. Do not store fans in a high humidity environment. We highly recommend performance testing is conducted before shipping, if the fans have been stored over 6 months.
- 8. Not all fans are provide with the Lock Rotor Protection feature. If you impair the rotation of the impeller for the fans that do not have this function, the performance of those fans will lead to failure.
- 9. Please be cautions when mounting the fan. Incorrect mounting of fans may cause excess resonance, vibration and subsequent noise.
- 10. It is important to consider safety then testing the fans. A suitable fan guard should be fitted to the fan to guard against any potential for personal injury.
- 11. Except where specifically stated, all tests are carried out at room (ambient) temperature and relative humidity conditions of 25°C, 65% RH. The test value is only for fan performance itself.
